Avatara's self-hosted solution allows clients the ability to share files with people outside of their organization and allows them to have access to specific files offline.

CompleteCloud Fileshare

Overview:

- As a self-hosted solutions, clients' data never leaves our data center walls, which allows for ITAR and HIPPA compliance.

- Employees can send large files by email with people inside and outside your organization.
    - ◆ No specific file size limitations. Share large GB size files with ease!

- Integrates with your CompleteCloud network shares via active directory.

- Create a public or a fully private share to files where clients can exchange business files with other clients easily and securely.
    - ◆ Limit the maximum number of downloads for a shared file, automatically expire a share after a certain time, anonymous file uploads, prevent downloads, integrate file uploads with your website and more.
    - ◆ Alert users in shared folders when files or folders are changed, to keep everyone on the same page with real-time collaboration.

File Sharing Made Easy!
